Projects

Damal Learning Application,
Role: Admin Panel Developer ✍
12/2024 – 01/2025

- **Tech Stack:** AngularJS
- Developed the admin panel for a subscription-based learning app using AngularJS. Implemented modules for user management, course uploads, subscription tracking, payment monitoring, referral code handling, and real-time notification control.

VR Doctor-Patient Management System,
Role: Lead Backend Developer
01/2025 – present

- **Tech Stack:** Node.js, Express.js, MongoDB, EJS, Razorpay
- Built the complete backend and admin panel using Node.js, Express, and EJS. Developed secure REST APIs for doctor onboarding, patient management, appointments, VR session tracking, and session-based billing with Razorpay integration.

School Lunch Box App, Role: Backend Developer
10/2024 – 12/2025

- **Tech Stack:** Nodejs, MySQL, REST APIs
- Built the backend subscription module for a school meal-ordering app. Developed APIs for weekly/monthly plans, order auto-generation, payment gateway integration, skip/pause/renew logic, admin control tools, and push/WhatsApp notifications.
